End-User Computing Products and Related Services

OECM's End-User Computing Products and Related Services agreement builds on its proven success with trusted OEMs you already know, such as Dell, HP/HPE, and Lenovo, and has been expanded to include Acer, Apple, and other OEMs like Cisco, Hitachi Vantara, NetApp, Pure Storage, and Super Micro. Our awarded supplier partners have committed to offer Most Favoured Customer Pricing for OECM customers and provide a comprehensive range of services, including planning support, configuration, installation, lifecycle management, warranty coverage, and more.

IT Project-Based Professional Services

This re-tendered agreement includes a range of new services, such as AI enablement, blockchain technology, business applications development, Internet of Things (IoT) solutions, legacy modernization, and more.

Laboratory and Science Supplies

Gain access to a curated list of qualified suppliers offering a wide variety of laboratory and science supplies, including equipment, biology supplies, chemicals, tools, instruments, and much more! The new, re-tendered agreement features an enhanced selection of microscopes.

Online Marketplace Platform Services

Gain access to discounted subscription rates for online marketplace platforms. The platforms feature an expansive inventory of small-ticket items across multiple categories.

Plagiarism Detection Software and Related Services

Gain access to comprehensive plagiarism detection software designed to support academic integrity and enhance the learning experience by providing a wide range of features tailored to the needs of educational institutions.

Vehicle Rental and Related Services

Gain access to a variety of rental vehicles for both passenger and commercial use, including options for transporting goods, personnel, and equipment. This agreement also covers associated services such as maintenance, insurance, and roadside assistance.
